

"My time at New Mexico Junior College was a rewarding experience. The professors and staff there provided me with the skills necessary to be successful as an IT Technician, as well as the education and rigor needed to continue my education at Texas Tech University. Their professors provided the one-on-one time that was crucial to my early success. The NMJC Foundation staff helped me navigate the financial burdens of college while helping me apply for scholarships that would go on to fund my education."

-J. Windle, NMJC student

"When applying for my scholarship, I had very high hopes, and some doubts, but I knew it would come through. When I received it, I was so happy that it was going to help pay for my Cosmetology kit and supplies that I would need in the future for my courses."

-V. Onsurez, NMJC student

"...I felt so intimidated with the idea of getting into college. NMJC provided a great welcoming atmosphere. They also have many tools and services to make the college experience fun, interesting, and easy. The staff, faculty, professors, and even some students were very motivating and always ready and happy to help. I'm glad I decided to join NMJC's community, as they helped me enhance my abilities and qualities in a personal and professional way to reach my academic goals."

-M. Gonzalez, NMJC student
